EXPERIENCE

Meta

Senior Software Engineer

Seattle, WA

Mar 2025 – Present

- Technical lead for Facebook Sharesheet (**2B opens/day**); drove **3-engineer workstream** delivering **+2M shares**, **50% faster loads**, and **99.9% fewer failures** while aligning product, data science, and UXR.
- Bootstrapped Android architecture for Messenger People Tab (**6.3M DAU**); built UI and data lifecycle patterns enabling team to ship features fast.
- Leading removal of all unused feature flags from Facebook and Messenger, enforcing as a build failure; projected **~\$200k/year** capacity savings.
- Built cross-platform reporting and notifications infrastructure for Messenger Moments launch (Android, iOS, server); required for safety compliance and user adoption.
- Leading Messenger live location feature for peer-to-peer sharing; aligning E2EE architecture and legal to deliver a privacy-first live location experience.

Amazon

Software Development Engineer

Seattle, WA

Feb 2021 – Feb 2025

- Architected zero-to-one **Rust** cross-platform build tool; became org standard for **Fire TV** (**200+ engineers**, **70+ packages**) with rollout expanding to additional Amazon orgs.
- Built heartbeat processing service (**8.1M heartbeats/min**) and metrics ingestion service (**3B metrics/day**) powering billing and observability for [GuardDuty Runtime Monitoring](#)'s **global GA launch**, announced at **re:Invent 2022**.
- Implemented **blue-green deployment** infrastructure enabling **zero-downtime deploys** for a core service at **100k+ TPS**.
- Designed and built org-wide data catalog adopted across all of GuardDuty engineering and research, scaling to **157 datasets** across **40+ engineers** and **6+ teams**.

PROJECTS

MetPro34.com | [Acquired by J.W. Pepper and Son](#)

Feb 2023

- World's first cross-platform, cloud-based programmable metronome app for ensembles; reached **950 users** before acquisition. Available on [Web](#), [iOS](#), and [Android](#).

EDUCATION

University of Connecticut

Storrs, CT

B.S. in Computer Science

B.A. in Applied Mathematics

TECHNICAL SKILLS

Languages: Rust, Kotlin, Python, Typescript/Javascript, Java

Areas of Expertise: Developer tooling, Distributed systems, Android platform engineering, Cross-platform development, Cloud infrastructure (AWS), CI/CD & build systems
